

### About the job

Start your journey in data science and image processing with us and unlock your potential for a bright career!

Company: Confidential

Location: Remote or Pune Office

Duration: 3 Months (with the opportunity to be hired as a Data Science Engineer upon successful completion)

Stipend: Unpaid

### About the Internship

Are you passionate about Python programming, data science, and image processing? Join our 3-month internship program to work on cutting-edge projects, enhance your skills, and secure the opportunity to become a full-time Data Science Engineer with us.

### Responsibilities

- Develop and debug Python scripts for image processing and data analysis.
- Work with libraries like NumPy, pandas, OpenCV, scikit-learn, and TensorFlow.
- Preprocess and analyze large datasets to derive actionable insights.
- Implement machine learning algorithms and optimize performance.
- Collaborate with a team of professionals to create innovative solutions.
- Document and present progress during the internship.

### Who Can Apply

We are looking for enthusiastic graduate, undergraduate, or postgraduate students who:

- Are proficient in Python programming and familiar with libraries like NumPy, pandas, and OpenCV.
- Have a basic understanding of data science concepts and tools such as Jupyter Notebook.
- Have knowledge or experience in image processing techniques.
- Are eager to learn, solve challenges, and grow professionally.

- Are available for a 3-month full-time or part-time

internship.

- Are motivated to transition into a full-time Data Science Engineer role.

#### Perks

- Flexible work location: Choose to work remotely or from our Pune office.
- Real-world project experience to build your portfolio.
- Mentorship from experienced industry professionals.
- Certificate of Internship upon successful completion.
- Opportunity for a full-time role as a Data Science Engineer post-internship.
